## **DETAILED ACTION**

## Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species 1, depicted in Figures 2a and 2b, drawn to a ring-shaped microgenerator device disposed in the epicardium;

Species 2, depicted in Figure 3, drawn to a spiral shaped microgenerator device disposed between the pericardium and myocardium;

Species 3, depicted in Figure 4a, drawn to a hollow, ring-shaped microgenerator device having bellowed joints;

Species 4, depicted in Figure 4b, drawn to a hollow, ring-shaped microgenerator device having a narrow tail end disposed within a wide head end;

Species 5, depicted in Figure 5, drawn to a hollow, ring-shaped microgenerator device having multiple compartments;

Species 6, depicted in Figure 6, drawn to an arc-shaped micro-generator with a first end secured to heart tissue and a second end having at least one degree of freedom to move;

Species 7, depicted in Figure 7, drawn to a micro-generator with a flared sidewall; and

Species 8, depicted in Figure 9, drawn to an internally-powered pacemaker system disposed between the myocardium and the epicardium.

The species are independent or distinct because each embodiment of the invention does not require the particulars of the various other embodiments.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 3766

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Page 4

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tammie Heller whose telephone number is 571-272-1986. The examiner can normally be reached on Monday through Friday from 7am until 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on 571-272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
